Tableau Reader Tableau Online Tableau Public Cloudera Virtual Machine Cloudera provides a scalable, flexible, integrated platform that makes it easy to manage rapidly increasing volumes and varieties of data in your enterprise. Cloudera products and solutions enable you to deploy and manage Apache Hadoop and related projects, manipulate and analyze your data, and keep that data secure and protected. Cloudera, Inc. is a US-based software company that provides a software platform for data engineering, data warehousing, machine learning and analytics that runs in the cloud or on premises. Cloudera started as a hybrid open-source Apache Hadoop distribution, CDH (Cloudera Distribution Including Apache Hadoop), that targeted enterprise-class deployments of that technology. Cloudera states that more than 50% of its engineering output is donated upstream to the various Apache-licensed open source projects (Apache Spark, Apache Hive, Apache Avro, Apache HBase, and so on) that combine to form the Apache Hadoop platform. Cloudera is also a sponsor of the Apache Software Foundation.[2] To make it easy for you to get started with CDH, Cloudera Manager, Cloudera Impala, and Cloudera Search, these virtual machines include everything you need. Table format of data set Advantage We provide the proper analyze view in Graphical representation manner. We also provide the map view and graphical representation of famous food. Disadvantage We not provide the all country suicide information. We not provide the location tracking system in this website. System Design Details Flowchart Home Page (Main Page) | To select one of the options of nav bar. | Then cursor goes to the corresponding link pages. | Then the suicide attempts analyze graphs and check it. | Then cursor goes to the dropdown menu link pages. | Graphical representation. | Map view of famous food places. LIBRARY IN R STUDIO: - lattice library package. 3) Methodology: Home page Selection of navbar items. Selection of analyze graph. View the graph View the map 4)Flow of website: Home page (Main page) ---- navbar menu----About us page----list of country ------country information and specific suicide attempts numbers------ Analyse graph---Map view of various country--contact us page. 5) Tableau software connected to cloudera cloud. 6) cloudera virtual machine For connection of Tableau and cloudera. For import dataset on cloudera. Results Test case TEST CASE 01 Test Case ID Test Scenario Test Steps Test Data Expected Output Actual Results Pass/Fail TC01 When click the learn more button it must take the user to its redirected. 1. Go to site file:///F:/final_project_sem6/main/index.htmlClick on learn more button. None When click the learn more button then redirect the next web page. As expectedPass TC02 When click on the navigation items they must take user to corresponding link pages. Go to site file:///F:/final_project_sem6/main/index.htmlClick on any of navigation item. None When click on navigation item then go to the corresponding link page. As expectedPass TC03 When click on logo on the page it should go to the home page. Go to site file:///F:/final_project_sem6/main/index.htmlClick on logo of page. None When click on logo then go to their home page or redirected page. As expectedPass TC04 When mouse or cursor is scroll then it must scroll till footer page. Go to site file:///F:/final_project_sem6/main/index.htmlScroll the mouse on page. None Webpage should scroll down till footer page arrives. As expected. Pass TC05 When click on any link of footer page then it should be redirected properly. Go to site file:///F:/final_project_sem6/main/index.htmlGo to footer page. Click on any link in footer. None The link is work it go to there redirected page. As expectedPass TEST CASE 02 Test Case ID Test Scenario Test Steps Test Data Expected Output Actual Results Pass/Fail TC01 Suitable design of the slider on all browsers (browser compatibility). Go to site file:///F:/final_project_sem6/main/index.htmlGo to the image slider. None Design of the slider is properly display on all browser. As expectedPass TC02 Smoothness and automatic loading of the slides. Go to site file:///F:/final_project_sem6/main/index.htmlGo to the image slider. None Image slider is automatically loaded. As expected Pass TC03 Correct order of the slider images Go to site file:///F:/final_project_sem6/main/index.htmlGo to the image slider. None Image slider order is correct. As expectedPass TC04 Whether the slides can be clicked and thumbnail is getting displayed on mouse overing. Go to site file:///F:/final_project_sem6/main/index.html 2.Go to the image slider. 3.Click the thumbnail. None Thumbnail is display on the slides. As expected. Pass TC05 When click the next thumbnail image should be change. Go to site file:///F:/final_project_sem6/main/index.htmlGo to the image slider. Click the thumbnail arrow. None Image is change when click the thumbnail arrow. As expectedPass Graphs Conclusion In this project, we must conclude the various country suicide attempts in graphical representation with the help of dataset. Finally, on the ethics of suicide, it must be noted that suicide is an act, a definite act with very final consequences. Therefore, this act must be looked at differently from some other issues of modern freedoms, or even ideas surrounding the right to die with dignity. Proper, timely death can be an affirmation of the life process. These are the distinctions that the nurturers, and all human beings, must make. If life cannot be easily right or wrong, black or white, it can be a process of thoughtful choices that emphasize the compassionate dignity which humans are capable of. Hopefully, then, the reader will have learned from Plath's art and her life, and thus, her tragedy can be another people's salvation. Future Enhancement In this project, to specify the various country suicide attempts view and with the help of tableau represents the graphical representation of suicide feed. The future enhancement of given website is following: We provide the area-based analyses and show the graphical representation on it. We provide the reason for suicide attempts people. We provide proper graphical representation on area-based and country-based suicide feed. We developed application for suicide attempts feed. The future enhancement of given project to analyse and collect more information about the various Area and number of suicide attempts in suicide feed dataset.
